Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/18/06 has been entered.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: explicit basis is lacking for the phrase “wherein a third portion of the sidewall extends from the [perpendicular] second portion to the and in contact with the thin-film surface of the substrate and defines an obtuse angle with the second portion as measured through the slot” (as in claim 21, and the other independent claims).

Since this feature is why the claims are allowable over the prior art, explicit basis should be present in the specification in addition to being shown in the figures.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-7, 9-11, 13-19 and 21-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Explicit basis is lacking for the phrase “wherein a third portion of the sidewall extends from the [perpendicular] second portion to the and in contact with the thin-film surface of the substrate and defines an obtuse angle with the second portion as measured through the slot” (as in claim 21, and the other independent claims).

Election/Restrictions

The claims withdrawn from consideration should be cancelled.

Allowable Subject Matter

Claims 1-7, 9-11, 13-19 and 21-29 are allowable over the prior art.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest forming the perpendicular, obtuse and parallel sidewalls, as in context of claim 21.

Applicant's point is well taken that the closest prior art, Silverbrook, does not disclose or suggest to form a parallel first portion and a third portion of the sidewall that extends from the perpendicular second portion to the and in contact with the thin-film surface of the substrate and defines an obtuse angle with the second portion as measured through the slot, as in the context of claim 21.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anita K. Alanko whose telephone number is 571-272-1458. The examiner can normally be reached on Mon-Fri until 2:30 pm (Wed until 11:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nadine Norton can be reached on 571-272-1465. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
